

Profile Summary

A results-oriented, process-focused, highly motivated Software Engineer with over 1+ year of professional experience in analysis, design, development, testing, implementation and deployment of various Salesforce solutions. Adept at analyzing Business requirements, customizing out-of-the-box Salesforce functionalities and delivering efficient solutions to optimize processes and drive business growth. Skilled team player, patient, dependable, quick learner with excellent problem-solving, logical thinking and analytical abilities who is dedicated to meeting customers' requirements.

Work Experience

Incture Technologies

Associate Software Engineer

March 2022 – Present
Bangalore, India

- Worked as a Salesforce Developer for a B2C project leveraging LWC, Apex, Aura and Visual Force
- Utilized Lightning Web Components(LWC) to build responsive and modern user interfaces, ensuring a seamless user experience across all devices.
- Implemented impactful enhancements which have significantly elevated the functionality and the overall user experience
- Developed and maintained custom objects, fields, workflows, validation rules, page layouts, and other Salesforce configurations to meet business needs and enhance user experience
- Integrated various third-party libraries with Salesforce to extend its capabilities and streamline processes
- Developed Apex classes, triggers, and Visualforce pages to create custom functionalities and address complex business logic requirements
- Collaborated with the Stakeholders, Clients, Business Analysts and team members on a regular basis to understand project scope and design effective solutions
- Contributed to testing and quality assurance to identify and resolve issues in the application and also drafted the test cases
- Participated in code reviews and provided constructive feedback to ensure code quality and adherence to best practices.
- Provided end-to-end technical support and resolved issues, ensuring effective adoption and utilization of Salesforce solutions
- Contributed to the documentation of project specifications, configurations, and development processes
